6. Country information;

a) What is the climate in Bangkok, Thailand?
Thailand climate is controlled by tropical monsoons and the weather in Thailand is generally hot and humid across most of the country throughout most of the year. The average temperature for Bangkok in September is usually around 29°C and it’s still very warm, despite the high chance of showers. The highest ever recorded temperature in September for Bangkok is 37°C with the lowest being 22°C. The rainy season lasts from July to October and is dominated by the southwest monsoon, during which time rainfall in most of Thailand is at its heaviest. However, like the ‘cool’ season, the name ‘rainy’ season is slightly misleading. While it certainly does rain during this season, it’s more likely to consist of flash-flood afternoon downpours than a continual drizzle for days. It’s typically sunny throughout the rainy season, but when the rain comes, it’s fast and quite furious.
